

PERFECTION
S E R V O

AC/DC DRIVES

Perfection Servo is the single source for all your Motor Drive repair needs. Perfection services all major brands including: Allen Bradley, Reliance, GE, Indramat, Siemens, and ABB.

Every unit we receive is initially cleaned and static-checked. It is then dynamically tested to replicate the described problem. Once the unit is approved for completion it is repaired and load tested on Perfection's custom built load tester to simulate your application. All Motor Drives are returned with a service report and a one year in-service warranty.

The manufacturers we commonly service are:
