

PERFECTION
S E R V O

HMI's

The user-friendliness of Human Machine Interface control panels have made them indispensable on the plant floor. Unfortunately, they are one of the most fragile components in your entire system. Perfection Servo has a staff of trained technicians who will clean, static-check, and test your HMI to evaluate its condition. Upon approval, we will repair and test your unit. Every HMI carries our one year in-service warranty.

The manufacturers we commonly service are:

- Bradley
- Cutler Hammer
- Eaton
- GE/Fanuc
- General Electric
- Omron
- Siemens
- Total Control Products
- Uniop
- Xycom
