SERVO CONTROLS

Perfection Servo's expertise in servo motor repair is mirrored by our Electronic Department's mastery of servo controls. Every unit we receive is initially cleaned and static-checked. Once the unit is approved for completion it is repaired, and in most cases, load tested on Perfection's custom built load testers to simulate your application. All servo controls are returned with a service report and a one year in-service warranty.

The manufacturers we commonly service are:

- Aerotech
- Allen Bradley
- Baumuller
- Berger Lahr
- Compumotor
- CSR Contraves
- Electro-craft
- Emerson
- Eurotherm
- Fanuc
- Indramat
- Kollmorgen
- MTS
- Pacific Scientific
- Parker
- Sanyo Denki
- Siemens
- Yaskawa
