

**PERFECTION**  
S E R V O

## **SPINDLES**

Worn grinding, drilling, boring and milling spindles can slow down your production and throw off tolerances, resulting in lost time and increased scrap or rework. Perfection is capable of restoring their speed and precision through comprehensive evaluation, repair and rebuilding. We can handle the widest variety of milling and grinding spindles and ensure complete satisfaction. Bearings are replaced on all rebuilt spindles and each unit is run-in to guarantee peak performance.

### **We rebuild spindles for:**

- external grinders
- tool grinders
- internal grinders
- jig grinders
- surface grinders
- milling machines
- routing machines
- drilling machines
